**UNVERIFIED
METHODOLOGY**

43 minutes saved
per worker per day

30,000+ workers

90 organisations

National rollout
justification

THE HOOK: A NUMBER WITHOUT A FOUNDATION

43

**NO VALID
USER GROUP.**

A productivity figure can only be valid where eleven distinct variables are disclosed: user role, task type, baseline time, AI-assisted time, review time, time, correction time, rework time, error recovery time, training protocol, and risk category.

Without those elements, the figure is not an auditable finding. It is a headline number.

THE REQUIRED VALIDATION CHAIN

Q1: Who is the worker?

Q2: What task was tested?

Q3: What was the calculation?

Q4: Was the user trained?

Q5: Was the risk category tested?

WAITING TO BE FILLED

EVIDENTIAL GATE

CLAIM CANNOT PROCEED

Q1: WHO IS THE WORKER?

Doctor	Finance
Nurse/matron	Legal
Ward clerk	Safeguarding
Ambulance dispatcher	Data governance
Pharmacist	Estates
Mortuary officer	Porter
HR officer	Management

Q1 —
FAILED

DENSE INFORMATION FRAMEWORK

Q1: WHO IS THE WORKER?

UNDISCLOSED

INFORMATION VISUALIZATION

IF ROLE IS NOT DISCLOSED

IF ROLE IS NOT DISCLOSED

→ The 43-minute figure has no valid user group.

MINIMALIST & IMAGE-DRIVEN EXPRESSION

THE STRONGEST LINE

A doctor reviewing a discharge summary is not a porter managing logistics. If the role is not disclosed, the figure has no denominator. It is an average without a population.

QUESTION: DOING WHAT?

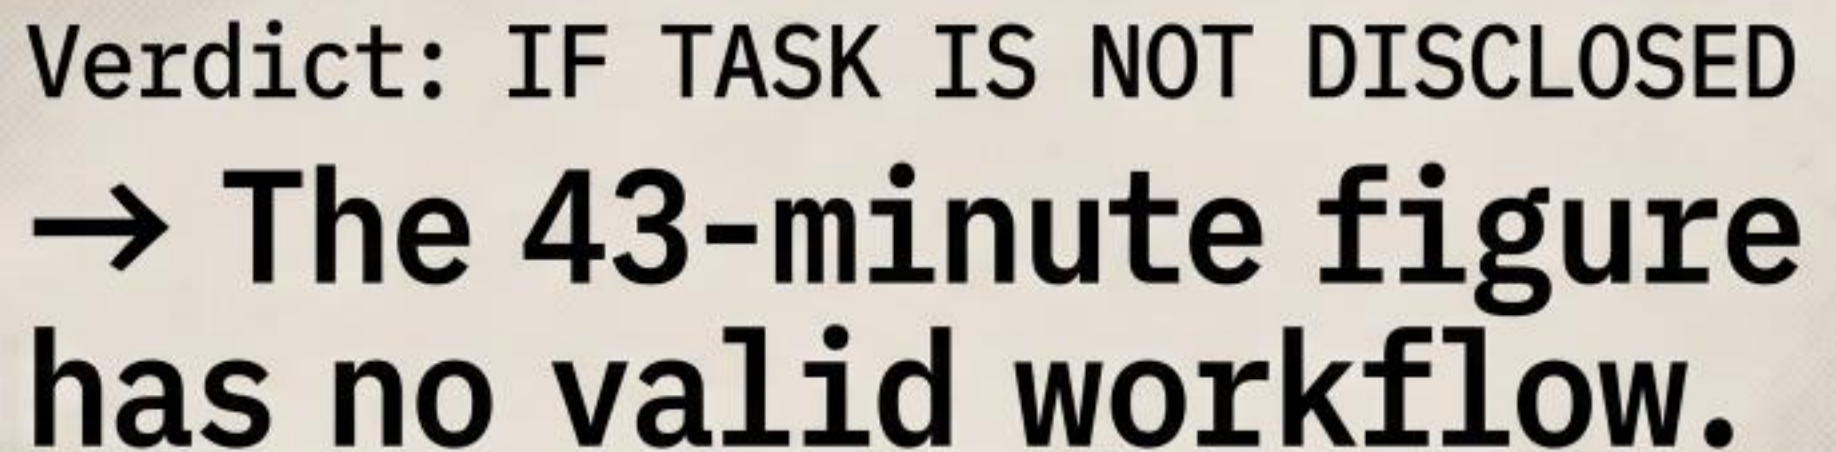

- Bed management
- Discharge planning
- Rota building
- Meeting summary
- Email drafting
- Patient letter
- Referral summary
- Pharmacy admin
- Ambulance handover
- Finance report
- HR case note
- Legal defence
- Complaint response
- Safeguarding note
- DPIA document

Q2 —
FAILED.

UNDISCLOSED

Verdict: IF TASK IS NOT DISCLOSED
→ **The 43-minute figure
has no valid workflow.**

THE 43-MINUTE CLAIM: Q3: MEASURED HOW? (THE FORMULA)

Verdict: NOT AUDITABLE

**PUBLIC INTEREST
DISCLOSURE**

**EXHIBIT
A**

$$S = M - (A + R + C + W + E)$$

time

EVIDENCE

Prompt/
hallucination
trained
nombed

PROMPT KEY:

S = real saving
M = manual baseline time
A = AI-assisted time
R = review/checking time
C = correction time
W = rework time
E = error recovery time

PROMPT KEY:

S = real saving
M = manual baseline time
A = AI-assisted time
R = review/checking time
C = correction time
W = rework time
E = error recovery time

IF M, A, R, C, W, AND E ARE NOT DISCLOSED → THE 43-MINUTE FIGURE IS NOT AUDITABLE.
The NHS has published a result without publishing the route to the result. In public-sector deployment, that is not due diligence.

Memorize this line. Demand accountability.

Q4: TRAINED FOR WHAT?

Was the user trained?

- Prompt training?
- Hallucination detection?
- Drift recognition?
- Source checking?
- Data minimisation?
- Confidentiality limits?
- Escalation rules?

**NO TRAINING
PROTOCOL DISCLOSED**

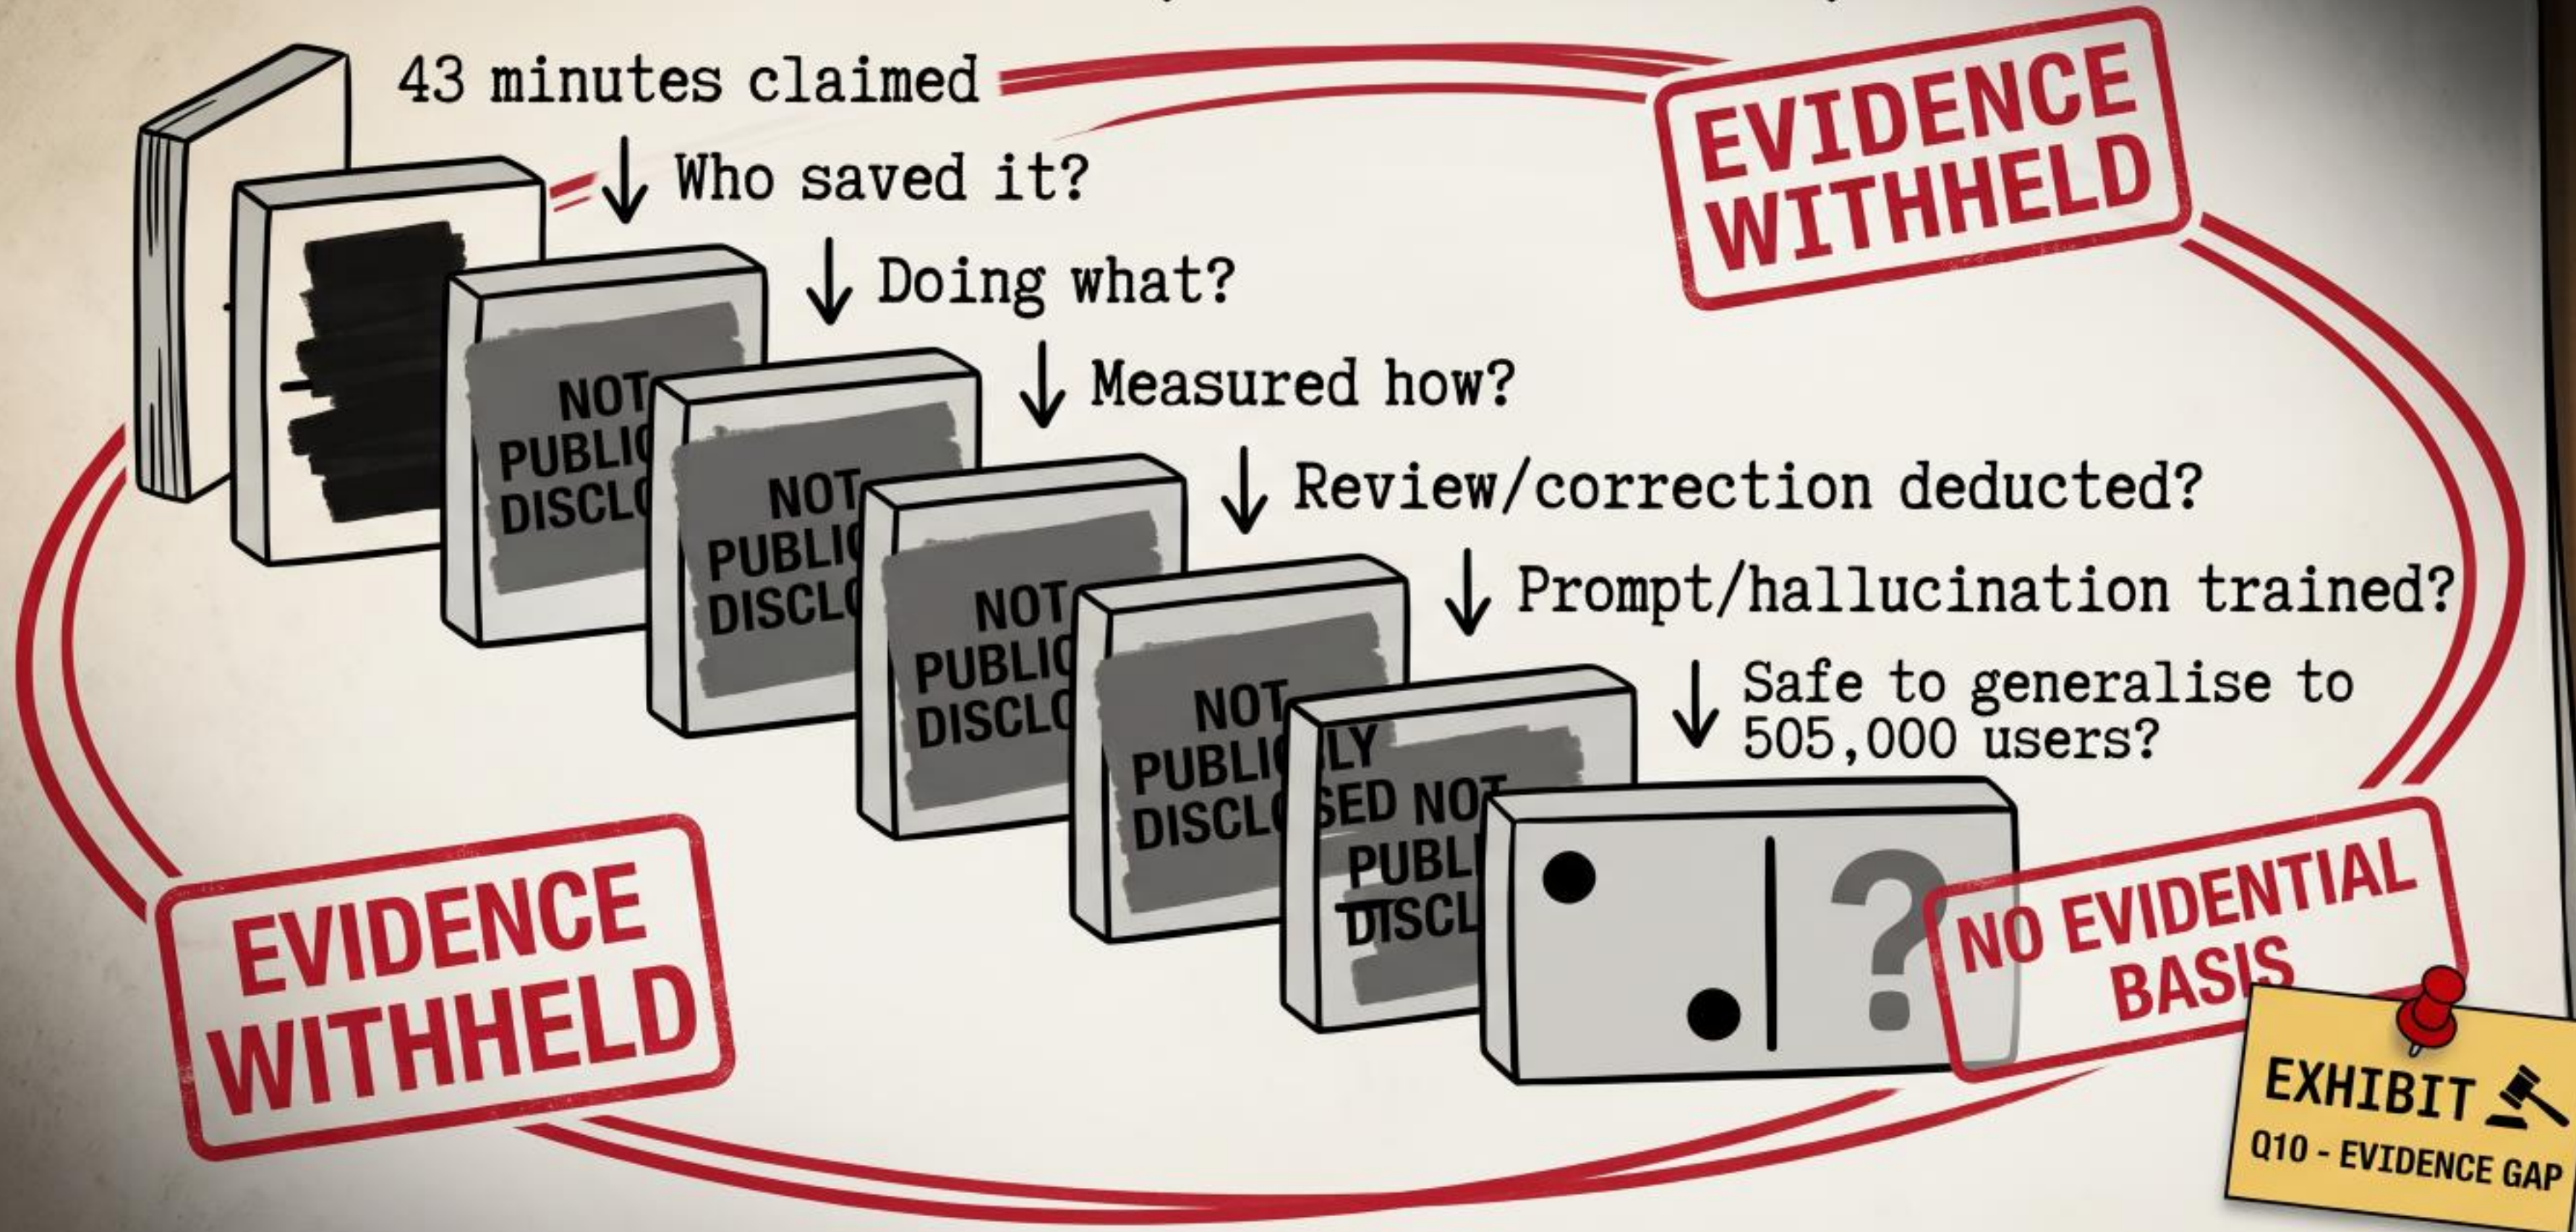

Verdict: IF TRAINING IS NOT DISCLOSED → The result cannot prove safe use.

An untrained user with a large language model is a liability generator.

Demand accountability. truthfarian.co.uk

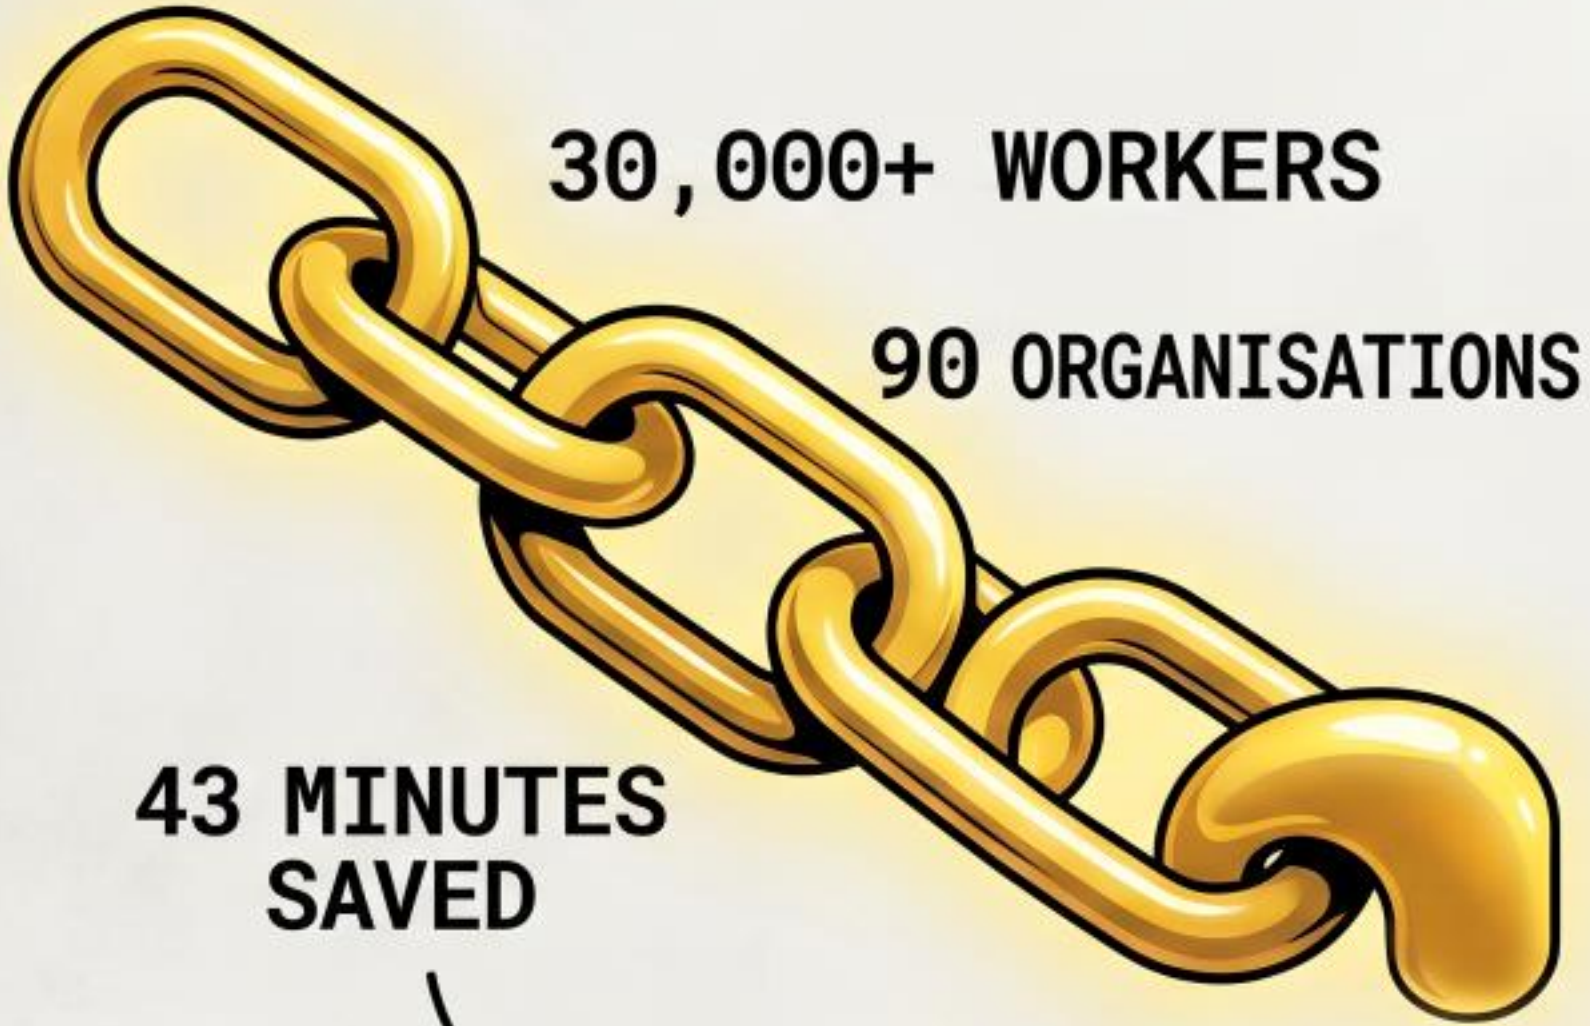

INDISCLOSED

THE DEFECT FLOW (CONDENSED)

CHAIN A: WHAT THEY PUBLISHED

WHAT THEY PUBLISHED

30,000+ WORKERS

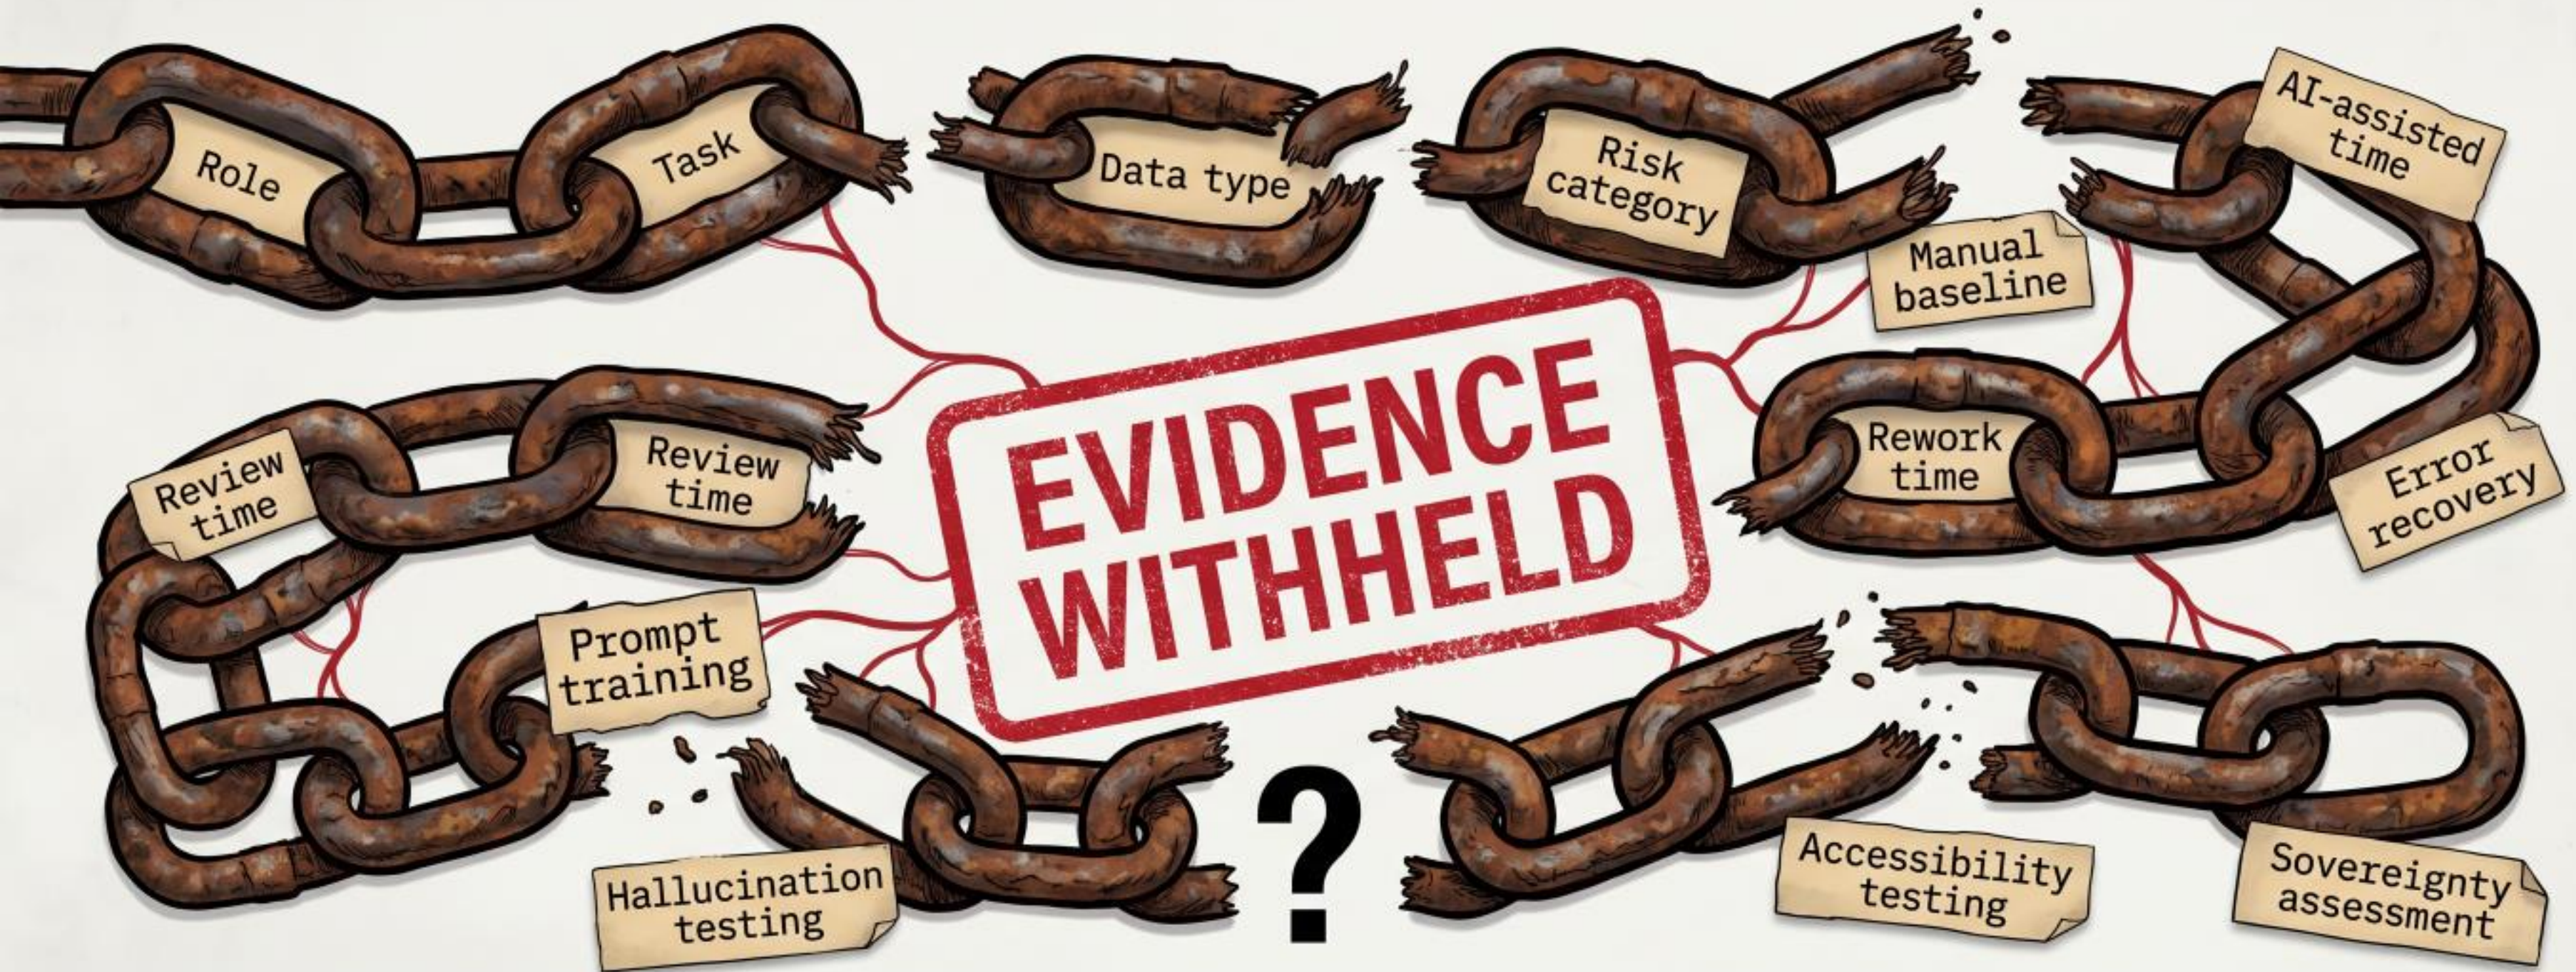

90 ORGANISATIONS

**43 MINUTES
SAVED**

**EQUALS:
NATIONAL ROLLOUT
JUSTIFICATION**

CHAIN B: WHAT WAS REQUIRED FOR VALID DEPLOYMENT EVIDENCE

**FOURTEEN LEGAL VARIABLES.
THE UNPUBLISHED CHAIN.
equals: VALID DEPLOYMENT EVIDENCE.**

14 legal requirements for valid deployment in public-sector procurement. The gap between Chain A and Chain B is the core failure. They published the result without publishing the route.

THE LEGAL VERDICT

The 43-minute figure appears arbitrary because the public claim does not disclose the variables required to make it meaningful.

A valid productivity figure requires disclosure of:

- User role & task type
- Baseline vs. AI time
- Review & correction time
- Rework & error recovery time
- Training protocol
- Risk category

Without these elements, the figure is not an auditable finding. It is a headline number. In public-sector deployment, that is not due diligence.

ASSERTION NOT EVIDENCE

Q5
**UNAUDITABLE
FINDING**

THE STRONGEST LINE

The number may exist as a reported claim, but it does not presently exist as public Mce.

And the strongest line:

THE NHS HAS PUBLISHED A RESULT WITHOUT PUBLISHING THE ROUTE TO THE RESULT. IN PUBLIC-SECTOR DEPLOYMENT, THAT IS NOT DUE DILIGENCE.

Q6 —
VERDICT
